## Regular Expressions to NFAs

Alex Aiken

NFA

Regular
expressions

DFA

Lexical
Specification

Table-driven
Implementation of DFA
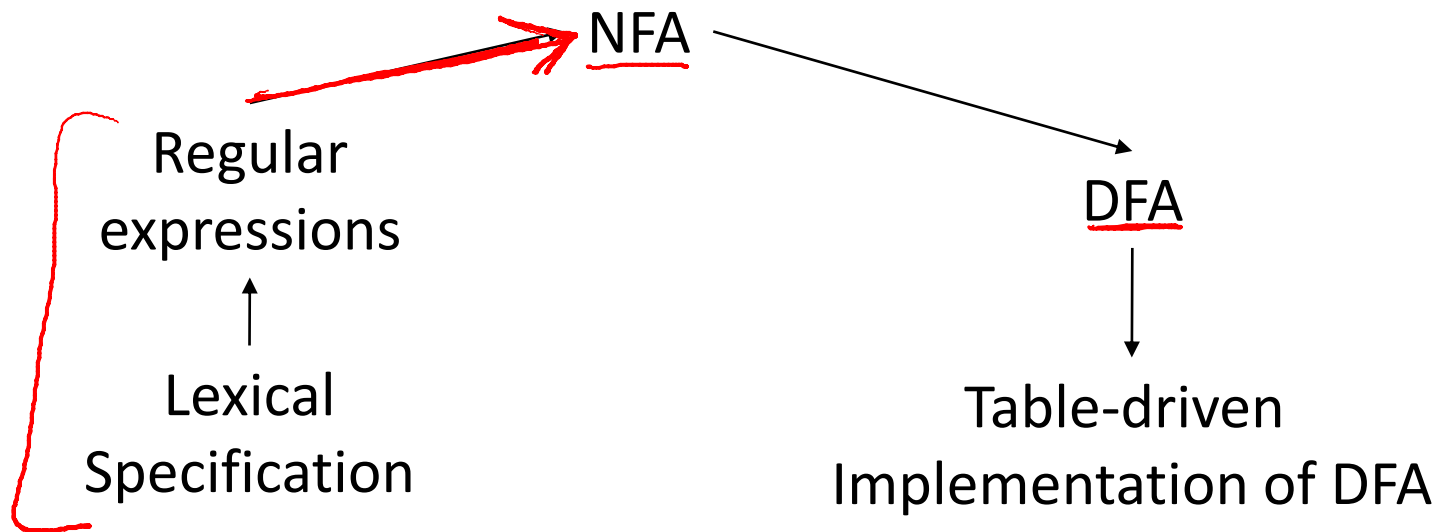

For each kind of rexp, define an *equivalent* NFA
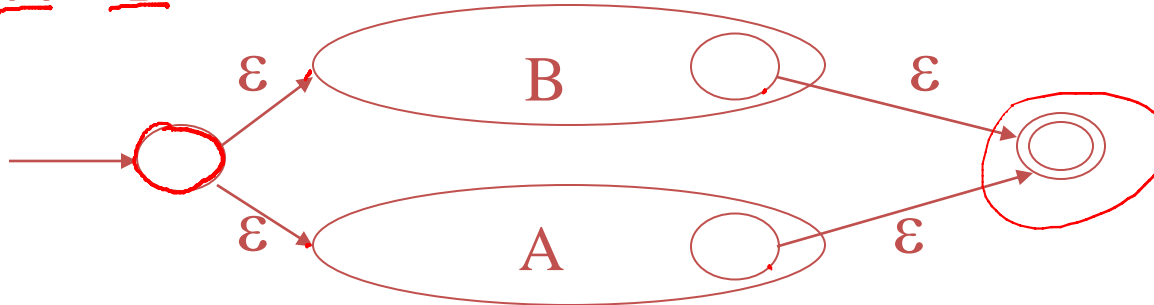

– Notation: NFA for rexp M

- For ε

- For input a

Alex Aiken
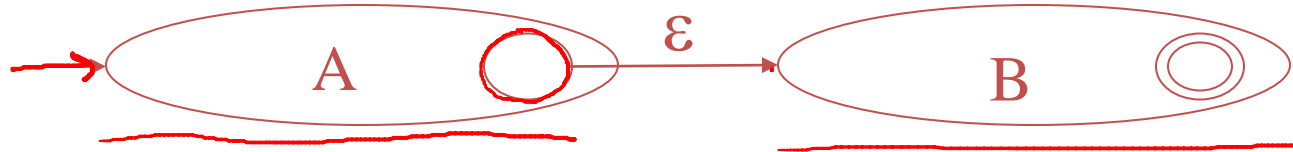

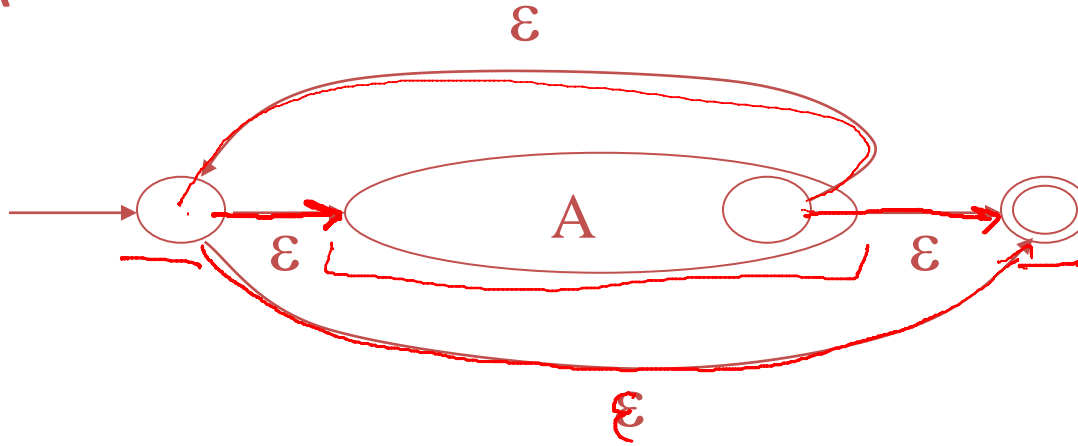

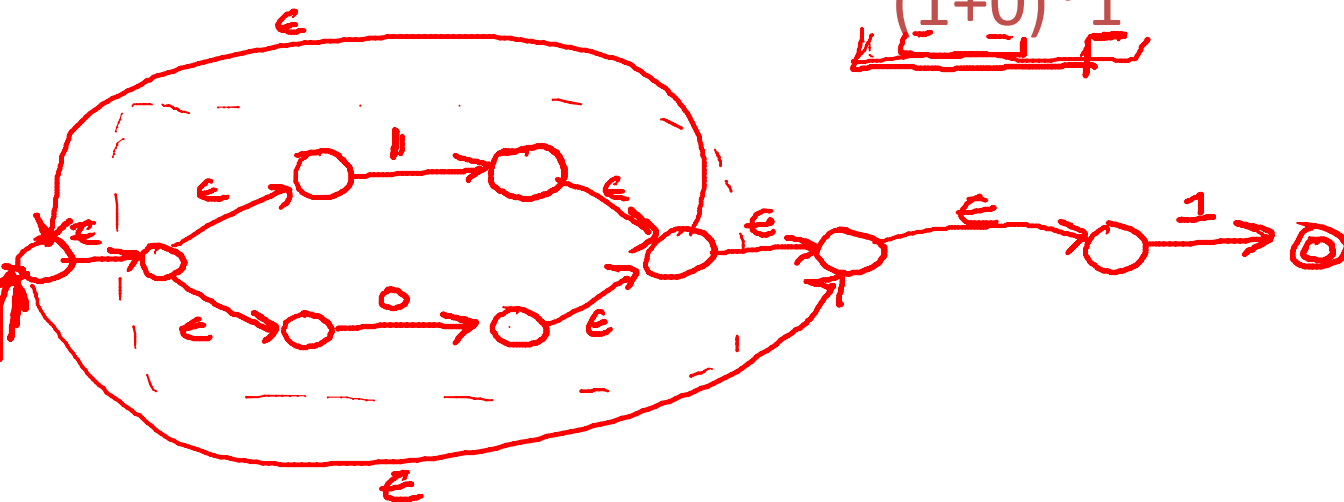

- For AB

- For A + B

- For A*

- Consider the regular expression

$(1+0)*1$

Choose the NFA that accepts the following regular expression: 1* + 0

RegExp to NFA
